

**IN THE SPECIFICATION**

Please replace the paragraph beginning at line 28 on page 10 of the replacement specification filed August 13, 2004, with the following amended paragraph:

Referring still to Figure 6, Ethernet interface cards 614 and 623 are respectively coupled to modules 610 and 620 to enable base station 600 to communicate (e.g., through communication path 602) over an enterprise wide Ethernet back-bone. In the present invention having Ethernet interface cards 614 and 623 incorporated in modules 610 and 620 provides the scalability advantages of base station 600.
